General Terms and Conditions of Membership

A1 Use of Trusted Shops Brands

A1.1 Trusted Shops owns all existing intellectual property rights (including copyright, trademarks, design rights, rights in or relating to databases and rights in or relating to trade secrets) in the Trusted Shops Brands, the Online System and all other protectable Services supplied or licensed to the Member under the scope of this Membership Agreement.

A1.2 The member is prohibited from using Trusted Shops' brands or giving the impression that its website has been verified by Trusted Shops, unless the member is entitled to do so by being granted a license for use by Trusted Shops in accordance with section B.2 and/or section C.3 and by complying with the relevant [License Conditions](#).

A2 Fees and terms of payment

A2.1 The amount of the membership fee is based on the package-related Services of Trusted Shops according to the Price List. Invoices from Trusted Shops must be paid within 14 days of receipt. Trusted Shops reserves the right to charge dunning fees of up to 10 euros net in the event of late payment.

A2.2 If a set-up fee is incurred in accordance with the price list, this is due upon conclusion of the contract. The membership fee is due in advance in the first contract year upon conclusion of the contract and subsequently at the beginning of each contract year.

A2.3 If the Member orders additional paid Services during the contract year, the amount for the additional Services ordered for the period up to the end of the contract year is due at the time of ordering. From the following contract year, the amount for the additional service becomes part of the membership fee.

A2.4 The parties may enter into a deferred payment agreement separately. Trusted Shops is entitled to terminate any deferred payment agreement if the Member is in arrears with payment of an instalment for more than 14 days.

A2.5 In such cases the outstanding payment for the contractual year becomes due with immediate effect.

A2.6 Without limiting its rights under these Membership Terms or otherwise, Trusted Shops may, in its discretion, suspend its Services if the Member is late in paying any invoice for more than 7 days, provided that a reminder notice has been sent to the Member before. The same applies if the Member ultimately refuses to pay. The member's payment obligation remains in full in both cases. In repeated cases, Trusted Shops reserves the right to immediately deactivate and not provide the agreed Services for the duration of the payment delay.

A2.7 The Member confirms the exact VAT identification number and authorizes Trusted Shops to use this number to invoice sales under this number in accordance with the reverse charge procedure.

A2.8 The Member agrees that all invoices are submitted electronically. Consent may be revoked at any time in writing.

A2.9 Upon conclusion of the contract at the end of each contractual year, the Member shall, unprompted, provide truthful information, which is based on verifiable turnover figures for the last 12 months, about the anticipated Gross Turnover (before deduction of all cancellations, returns, etc.) generated in the current fiscal year throughout all its Websites registered with Trusted Shops. Trusted Shops is entitled to demand the proof on which this application is based.

A2.10 If the Member fails to provide information in accordance with A2.9, Trusted Shops is entitled to estimate the Gross Turnover by extrapolation or by using other sources of information, and/or to request proof from the Member for its Gross Turnover in the last twelve months. The Member is entitled to prove that its actual Gross Turnover deviates from the value estimated by Trusted Shops.

- A2.11 If the Gross Turnover, as indicated by the Member in accordance with A2.9, or as estimated in accordance with A2.10, exceeds or falls short of the anticipated Gross Turnover previously used as the basis for calculating the fee, a reclassification into a new turnover class may be demanded in accordance with the price list, with effect for the following contractual year, with regard to the membership fee, as in the case of any other individual service affected by such calculation.
- A2.12 If during the current contractual year Trusted Shops establishes that the Member's actual Gross Turnover significantly exceeds the anticipated Gross Turnover previously used as a basis (always presumed in case of an excess of 20% and/or 100.000 €), Trusted Shops may recalculate the membership fee in accordance with the price list within the current contractual year, with effect from the respectively following month. In such cases, the recalculation shall be based on the average monthly turnover extrapolated to the contractual year. The Member is entitled to prove that its actual Gross Turnover deviates from the estimated value.
- A2.13 If the Member is required or wishes to provide proof of its Gross Turnover in accordance with the above provisions, the following documents in particular shall be deemed to be reliable proof:
- A formal report on the last closed fiscal year (annual report);
 - Proof / confirmation from a tax advisor or auditor;
 - An extract (e.g. as a screenshot) from the Member's inventory management system or shop software system.
- A3 **Services provided by Trusted Shops**

- A3.3 For the availability of the Online System as a Software-as-a-Service service, the [Service Level Agreement](#) applies.

- A4 **Member's obligations**
- A4.1 The Member must provide at its own expense that the technical requirements necessary for the use of the Online Systems provided by Trusted Shops are met, in particular by preparing its own systems for the use of the Services.
- A4.2 The Member is obliged to comply with the applicable law, in particular the provisions of consumer law, as well as the standards and obligations set out in the [Compliance Policy](#) and the [Modern Slavery Code of Conduct](#) and to offer only those goods and services whose sale and/or offer are not legally prohibited and do not violate the Trusted Shops Exclusion Catalogue (TS-ASK) or the Compliance Policy or the Code of Conduct.
- A4.3 The Member is obliged to protect its access credentials (username and password) against unauthorized use by third parties and to keep its password secret. The Member must inform Trusted Shops immediately if it has reasonable suspicion that its access credentials have been misused.
- A4.4 During the term of this Membership Agreement, the Member shall respond to all enquiries by Trusted Shops and customers within five (5) days and shall also provide all information necessary for the processing of such requests. Trusted Shops shall determine whether the online shops must respond, either via the online system, by e-mail or in writing. The first response from the Member does not have to respond conclusively to the requests. An initial response within the deadline is sufficient.
- A4.5 The Member shall name at least one person of contact, and provide their contact details, to whom Trusted Shops can turn for all enquiries in connection with this Membership contract.
- A4.6 If the Member does not contract directly with Customers but acts as an intermediary between the Customer and a third party, the Member shall assure that the third party complies with the obligations set out in Section A4 and shall be liable for any breach thereof by the third-party supplier. Any failure to comply by the third party will be deemed as a failure of the Member.
- A4.7 The Member grants Trusted Shops and companies affiliated with Trusted Shops in terms of Section 15 of the German Stock Corporation Act (AktG), the non-exclusive, gratuitous right to use the company logo (brand) of the Member during the term of the agreement for their own advertising and marketing purposes on the company websites, in social media presence and in newsletters in order to draw attention to the cooperation (reference mention).
- A4.8 The Member is responsible at all times for the accuracy of all information transmitted to Trusted Shops. In particular, the Member is obliged to carefully check all company data that he enters or updates in the Online System and to ensure that it is correct and up-to-date. This applies in particular to all information published in company profiles. Trusted Shops assumes no responsibility for incorrect or outdated information provided by the Member. Should Trusted Shops become aware of incorrect data, the Member is obliged to adjust it immediately upon request. Trusted Shops is also entitled to update such information independently and to restrict the member's input options at its own discretion. If the member is given the opportunity to change his/her display name, the display name must be chosen in such a way that it allows the registered domain or company name to be inferred.
- A4.9 If the operator of the Website(s) changes, the Member is obliged to notify Trusted Shops of this immediately in writing in order to reach an agreement on the further use of the services. A change of operator does not lead to the termination of the membership contract and does not justify an extraordinary right of termination.
- A5 **Warranty and liability**
- A5.1 Trusted Shops is liable without limitation for damages caused by itself or its employees intentionally or through gross negligence.
- A5.2 Trusted Shops excludes liability for slightly negligent breaches of duty insofar as these do not relate to essential contractual obligations (obligations whose fulfilment is essential for the proper execution of the contract and on whose compliance the contractual partner may regularly rely, so-called cardinal obligations), life, health or body are affected or claims under the German Product Liability Act (Produkthaftungsgesetz) are affected.

This does not apply if the forwarding of this information is not permitted under data protection or professional law, in particular because the person concerned explicitly does not wish it to be forwarded. To this end, the Parties shall provide each other with contact addresses and notify each other of any changes in text form. - (2) The erasure of personal data must be documented by the Parties.
- (3) Obligations arising from Article 17 (2) GDPR must be fulfilled independently by the respective Party that has made personal data public. If the Parties have jointly made personal data public on websites operated by Trusted Shops, Trusted Shops is responsible for fulfilling the obligations arising from Article 17(2) GDPR.

The notification has to be made in text form. They shall provide each other with all the information necessary to investigate, remedy and assess the risk of the Data Protection Breach.
- (2) Both Parties are responsible for processing and reviewing a Data Protection Breach. They undertake to provide mutual support and to comply with any notification obligations in accordance with Articles 33 and 34 GDPR immediately. - (3) Data Protection Breaches and their processing must be documented by the Parties.

§ 7 - Documentation Duties

- (1) The Parties undertake to independently comply with the documentation obligations contained in the GDPR. - (4) Necessary information, access and inspection rights shall - within the framework of their statutory powers - be granted to data protection supervisory authorities by the Parties.
- (5) This is without prejudice to the Parties' right to seek legal remedy.

- (3) Should a processor be commissioned outside the EU/EEA, the commissioning party shall implement appropriate technical, organisational and contractual measures to ensure that the personal data is processed exclusively within the EU/EEA and, prior to the transfer of personal data to the third country, provide guarantees in accordance with Art. 44 et seq. of the GDPR for an adequate level of data protection to the other party and document this in writing in the contract for the commissioned processing. The other party has the right to object after reviewing the guarantees. In the event of an objection, the parties shall examine whether another appropriate safeguard comes into question. If no other appropriate safeguard comes into question, consent pursuant to Art. 49 (1) a of the GDPR shall be obtained by the user for the transfer of personal data to a third country.
- (4) Upon conclusion of a DPA, the concluding Party shall, upon request, provide the respectively other Party with a copy of the DPA.

- (1) The Parties are liable for their respective obligations towards the data subject in accordance with the statutory provisions.
- (2) With regard to their internal relationship, the liability of the Parties is determined by their respective area of responsibility, without prejudice to the provisions of this Agreement and any other liability distribution agreements of the Parties. Where both Parties are responsible for an area of data processing, liability for damages is determined in accordance with Section 426 of the German Civil Code (BGB) Article 82 (4) and (5) GDPR.

§ 11 - Final Provisions

- (1) This Agreement is an integral part of the Main Contract and is effectively concluded upon the conclusion of the Main Contract. Regarding the term and termination of this Agreement, the provisions of the Main Contract apply. Should there be any inconsistencies with regard to data protection provisions between this Agreement and other agreements between the Parties, in particular the Main Contract, the provisions of this Agreement will prevail.
- (2) Should any provision of this Agreement be or become invalid or contain loopholes, this will not affect the validity of the remaining provisions. The Parties shall undertake to replace the invalid provision with another, valid provision that comes as close as possible to the purpose of the invalid provision and meets the economic requirements as well as the requirements of data protection law.
- (3) German law applies.

Appendix I - Description of the cooperation

Both Parties jointly determine the purposes and means for certain data processing within the context of the Trusted Shops services which constitutes their joint controllership under data protection law in the sense of Article 26 GDPR, at least for certain data processing operations or parts thereof. The following appendix describes the cooperation between the Parties and the distribution of responsibilities between them. Joint controllership is only in place if and to the extent that the Parties have entered into the respective agreements of the main contract required for the described data processing activities, or the described product is used by the User. The Parties are free to process personal data obtained in the context of joint controllership for further purposes of their own, provided that this is permissible under the applicable data protection regulations and the data subjects are informed of this by the respective Party.

Where the User is responsible for information obligations in accordance with Article 13 GDPR within the scope of the data processing activities described below, it must refer to the Trusted Shops privacy policy on an appropriate spot. The privacy policy is available at the following link:

https://www.trustedshops.com/tsdocument/BUYER_AUTO_PROTECTION_TERMS_en.pdf

Trusted Shops also provides additional information in its [Help Centre](#). Among others, it contains a table of responsibilities and competences with the help of which the User can inform the data subjects about the essential contents of this Agreement pursuant to Article 26 (2) GDPR. Furthermore, there are non-binding working aids for the documentation of the balancing of interests mentioned in this Agreement.

The following processing activities are carried out by service providers with whom Trusted Shops has concluded a DPA. Where a third country transfer takes place, Trusted Shops is responsible for providing the appropriate legal framework, i.e. in particular, ensuring the existence of appropriate safeguards in the absence of an adequacy decision or an exemption pursuant to Article 49 GDPR. Trusted Shops will inform the User of any third country transfer that takes place within the scope of the joint controllership, so that the User can comply with information obligations it has towards data subjects.

Trusted Shops carries out monitoring and logging as part of all the listed processing activities to ensure system stability. In some cases, processors, also from the USA and other third countries, are used. The legal basis is Art. 6 para. 1 p. 1 lit. f GDPR. Trusted Shops carries out the necessary balancing of interests and is responsible for all documentation obligations. The user must inform the data subjects about the processing.

In the event that it is necessary to contact Trusted Shops, this should be done by e-mail to privacy@trustedshops.com.

1. Trustbadge and Widgets

1.1 Display of the widget

Data categories: Access data (IP address, time of access, etc.)

Trusted Shops provides various widgets (e.g., the Trustbadge) for the respective online presence of the User, and is solely responsible for their content and the data processing associated with them. The User's information obligations depend on the purpose for which the respective widget is integrated into the User's online presence.

The integration of the widget into the online presence enables the display of authentic customer reviews and, in the case of the Trustbadge, also the collection of customer reviews. The User is responsible for the display of the widget in the online presence. Its integration enables the display of the Trusted Shops Trustmark, the collection of reviews and the display of Trusted Shops services for buyers. The User must provide information on the integration of the Trustbadge in its privacy notices. The responsibility for securing the legal basis for this as well as for all associated information obligations rests with the User. Insofar as User invokes Article 6 (1) (f) GDPR as the legal basis for the data processing, it is responsible for documenting the legal basis and for carrying out the weighing of interests. Insofar as the User invokes Article 6 (1) (a) GDPR as the legal basis, it is responsible for documenting the legal basis and ensuring that it collects users' consent and can prove such consent. Trusted Shops will inform the User in case integrating the Trustbadge entails processing activities for which the data subjects' consent must be obtained, e.g. setting cookies.

When retrieving the Trustbadge, anonymous visitor server log files are stored. The data stored in particular includes the anonymised IP address, date and time of the visit, and the referrer. This serves the purpose of ensuring the proper functioning of the website and recording any unusual occurrences. The legal basis for creating and storing the log files is Article 6 (1) (f) GDPR. The User must provide information about the legal basis; Trusted Shops is responsible for documenting the weighing of interests.

1.2 A/B tests

Data categories: Access data (IP address, time of access, etc.)

Trusted Shops occasionally conducts A/B tests to analyse user behaviour in the User's online presence based on different variants of the widgets. For this purpose, it is necessary to set a cookie or store information in the user's local storage. Trusted Shops will inform the User in good time before the A/B test is carried out. The User has the option to object to the A/B test for its online presence. The parties shall agree on an appropriate legal basis before conducting the A/B test. The User is responsible for informing the user of the legal basis and, if necessary, for obtaining and documenting their consent.

2. Offering the Trusted Shops Buyer Protection services

The processing activities required for offering the Trusted Shops Buyer Protection services partly fall under the joint controllership of Trusted Shops and the User. These processing activities are described in the Agreement. Trusted Shops and the User are separately responsible for processing activities related to the Buyer Protection Services that are not listed in this Agreement unless otherwise specified by the nature of the data processing. In such a case, the Agreement must be amended to include such processing. Insofar as joint controllership arises from the nature of the processing, it is subject to this agreement.

2.1 Recognition of registered Trusted Shops Buyer Protection Service customers

Data categories: Hash value of the email address, transaction number, time of order, purchase amount

When integrating the Trustbadge, a hash value of the email address used by a buyer to make a purchase in the User's shop is transmitted to Trusted Shops after the order has been completed in order to check whether the buyer is already registered for the Trusted Shops Buyer Protection Services. Due to the contractual relationship between the Trusted Shops Buyer Protection Service customer and Trusted Shops, this verification is necessary in order to automatically enable the contractual services for orders placed on third-party websites. The hash value is collected through a DIV query. This leads to the Trustbadge accessing information stored in the purchaser's device, so that there is a consent requirement for this access in accordance with the ePrivacy directive and/or the respective local regulation. The user must ensure that consent for this access is obtained in accordance with the locally applicable ePrivacy regulation before any access takes place. Alternatively the user may integrate the Trustbadge in a way which may not require the user's consent due to local regulations. Trusted Shops offers integration options for this purpose. Information on this can be found in the [Help Centre](#) in the Data protection guideline – recognition of registered Trusted Shops customers.

The data collected consists of the buyer's order data, and is automatically deleted after verification. Article 6 (1) (f) GDPR constitutes the legal basis for the collection of the order data. The User must inform data subjects of the legal basis, whereas Trusted Shops is responsible for documenting the weighing of interests. Alternatively, the User may choose to base the processing on Article 6 (1) (a) GDPR; in this case, the User is responsible for fulfilling all obligations associated therewith under data protection law.

If the verification process determines that the buyer is already registered for the Buyer Protection Services, the order data necessary for activating the buyer protection for the purchase, i.e. for Trusted Shops fulfilling its contractual obligations under the [contract](#) it has with the buyer, is transmitted to Trusted Shops in accordance with Article 6 (1) (b) GDPR. The User shall comply with the information obligations under the GDPR (in particular under Article 13 GDPR). Trusted Shops also confirms the conclusion of the buyer protection by displaying the Trustcard in the checkout and sending an automatic email, and provides further information to the data subject.

2.2 Initial registration for the Buyer Protection Service by clicking on the Trustcard

Data categories: email address, transaction number, time of order, purchase amount, buyer protection product (Basic/Plus)

If the verification process described under Section 2.1 determines that the buyer has not yet registered for the Trusted Shops Buyer Protection Service, the buyer has the possibility to do so via the so-called Trustcard which is integrated into the User's online presence as part of the Trustbadge. By signing up for the Buyer Protection Service, the order data and the email address are transmitted to Trusted Shops for the purpose of setting up the Buyer Protection Account and securing the online purchase. Both the User and Trusted Shops are joint controllers in terms of this data transmission. The transmission of order data for the purpose of registering for the Buyer Protection Services, i.e. for Trusted Shops fulfilling its contractual obligations under the [contract](#) with the buyer, is based on Article 6 (1) (b) GDPR. Trusted Shops shall comply with the respective information obligations.

3. Evaluation invitations, evaluation submission and evaluation profile

Insofar as the User uses the Trusted Shops review system within the context of this Agreement, the following provisions apply. The User shall invariably be responsible for fulfilling the information obligations under Article 13 GDPR with regards to the dispatch of review invites.

Trusted Shops may use data transmitted by the user in the context of publishing a submitted rating, provided that there is a legal basis for this. The publication of the (abbreviated) name of a reviewer is based on the terms of use for the Trusted Shops feedback platform pursuant to Art. 6 (1) sentence 1 lit. b GDPR.

3.1. Collection of email addresses and sending of review invites

a) Sending review invites to Trusted Shops Buyer Protection Service customers

Data categories: email address, transaction number, time of order, product purchased (if provided), first name, surname and title (if provided)

Regarding the dispatch of review invites to Trusted Shops Buyer Protection Service customers, Trusted Shops and the User are joint controllers. Provided that the User integrates the Trustbadge, it must inform customers that their order data (email address, order number, order time) will be forwarded to Trusted Shops after placing their order for the purpose of receiving review invites. This is the only way to assign the reviews to a particular order. If the buyer is registered for the Trusted Shops services, the legal basis for this data transfer is the fulfilment of Trusted Shops' contractual obligations under its contract with the buyer in accordance with Article 6 (1) (b) GDPR. The review invites are sent on the basis of the contractual relationship between the Trusted Shops Buyer Protection Service customer and Trusted Shops in accordance with Article 6 (1) (b) GDPR. Trusted Shops is responsible for sending out the review invites, whereas the User may decide on the time of sending.

b) Sending review invites to non-buyer protection customers

Data categories: email address, transaction number, time of order, product purchased (if provided), first name, surname and title (if provided) and further optional data provided by the user

When using the Review Collector, the events API or AutoCollection, review invites are sent to buyers who are not registered for the Trusted Shops Buyer Protection Services. The User and Trusted Shops are joint controllers in terms of the respective data processing. The legal basis for the collection of email addresses and the sending of review invites is Article 6 (1) (a) GDPR. Collecting the necessary data for the purpose of sending review invites is the responsibility of the User who is solely responsible for obtaining the necessary consent from the data subject, and for all other obligations associated herewith. The User has to particularly inform its customers of the transmission of the necessary order data to Trusted Shops. Insofar as consent is not obtained for such data transmission, the User must ensure that an appropriate legal basis is provided and document it. Trusted Shops is responsible for sending out the review invites, whereas the User may decide on the time of sending.

c) Sending review invites using the Trustcard

Data categories: email address, transaction number, time of order, product purchased (if provided), first name, surname and title (if provided)

In case the User has integrated the Trustbadge but does not offer buyer protection, the buyer may, after check-out, be offered to consent to receiving review invites. If the buyer consents to receiving review invites, Trusted Shops and the User are joint controllers in terms of sending the review invites. Sending of the review invite and obtaining consent is the responsibility of Trusted Shops, whereas the User may co-determine the time of sending. Trusted Shops Buyer Protection Service customers receive the review invite even if the User does not offer Buyer Protection itself. The User's responsibilities correspond with the ones laid down in Subsection a). With regard to the recognition of registered Buyer Protection Service Customers, Clause 2.1 of this Agreement shall apply accordingly.

d) The User sends out review invitations using the Trusted Shops API.

Data categories: email address, transaction number, time of order, product purchased (if provided), first name, name and title (if provided)

By using the API, the User sends out review invites using a unique link that is created by Trusted Shops with the help of the order data submitted by the User. The User is required to ensure the legal basis for the respective data transfer to Trusted Shops, and is responsible for the fulfilment of all information obligations in this context. Trusted Shops carries out the data processing on the basis of Article 6 (1) (f) GDPR.

e) Use of the Reputation Manager

Data categories: As per points a – d of this paragraph

Insofar as it uses the Trusted Shops Reputation Manager to send review invites that contain links referring to third-party platforms, the User shall be responsible for fulfilling the required information obligations vis-à-vis data subjects. The provisions of this Agreement, in particular the ones contained in Subsections a) – d) of this section, additionally apply to the dispatch of review invite that is based on them.

3.2. Review submission

Data categories: Access data (IP address, time of access, etc.), e-mail address, name (if provided), place (if provided), submitted rating (text and stars), transaction number, product purchased (if provided), uploaded photo (if provided)

Trusted Shops is responsible for operating the review platform (in particular, the Control Centre, feedback forms, review forms or other types of forms) on which a data subject submits his/her review. Collecting and publishing the reviews falls under the joint controllership of Trusted Shops the User. Trusted Shops is responsible for providing the legal basis for the data processing and for fulfilling all information obligations in this context. This also concerns other processing activities carried out on the platform, such as tracking. As a general rule, Trusted Shops is solely responsible for tracking. Tracking falls under the joint controllership of Trusted Shops and the User insofar as tracking data is shared with the User. Trusted Shops is responsible for complying with Article 26 (2) GDPR.

Raters have the option of attaching photos to their review. To prevent offensive content or people from being visible on uploaded images, each image is analysed by AWS Rekognition before publication. The legal basis is Article 6 (1) (f) GDPR.

If the User comments on submitted reviews, or contacts the reviewer in any other way, in particular, via the Trusted Shops systems, the User is obliged under this Agreement to ensure that there is a legal basis for its actions. Trusted Shops is entitled to delete comments if the data subject concerned requests erasure and / or the User cannot provide the legal basis.

3.3. Blocklisting of email addresses

Data category: email address

As far as a data subject does not wish to receive review invites, he/she has the possibility to withdraw his/her consent vis-à-vis the User. Such withdrawal of consent only applies to review invites related to the individual User in question. Therefore, it is also possible for the data subject to unsubscribe from all review invitations by clicking on the unsubscribe link in the footer of the review invite emails, or by sending an email to Trusted Shops. Trusted Shops will then put the data subject's email address on a blocklist so that no more review invites - regardless of the User to whom they refer - are sent out. Trusted Shops is solely responsible for the blocklist which, however, has an impact on processing activities that are subject to the joint controllership.

In addition, data subjects can use the unsubscribe link in the footer of the review invite to unsubscribe from further review invites related to the channel (e.g. the shop in which the data subject has made a purchase) for which the review invite was sent.

3.4. Google integration

Data category: Submitted rating (text and stars),

If a member chooses to display collected reviews on their own Google company profile (Google integration), collected reviews are transmitted to the member's Google Merchant Center on a daily basis. Google does not receive any personal data, only the rating text and the associated star rating. However, it is possible that the reviewer publishes personal data in the review text, so that Google receives personal data in these cases. The legal basis for the processing is Art. 6 (1) p. 1 lit. b GDPR as the use of the review text is based on the terms of use.

4. Control Centre

4.1 General functions

Data categories: Access data (IP address, time of access, etc.), e-mail address, name (if provided), place (if provided), submitted rating (text and stars), transaction number, product purchased (if provided).

Trusted Shops provides the User with various information via the Control Centre that is either personal or based on the processing of personal data. This includes, in particular, the analytics data described in Section 3.2 of this Appendix for the sending and receipt of review invites, the management of submitted review in the form of commenting on reviews or reporting reviews, as well as the configuration options for the sending of review invites and the publication time of reviews.

If the User wishes to establish links between the Trusted Shops systems and its own systems or systems managed by the User (in particular, CRM or ticket systems), the User shall be responsible in this respect for all obligations arising from the GDPR within the scope of its joint controllership with Trusted Shops. In particular, it must ensure that all necessary data protection agreements are in place when it makes use of a third-party provider (e.g., for data processing), and that the necessary conditions for personal data transfers to a third country are met.

4.2. Smart Review Assistant

Data categories: submitted rating (text and stars)

Trusted Shops optionally provides the user with an AI-supported system to comment on reviews received. The system analyses the review comment and suggests a reply comment to the user, which the user can then release for publication. The service provider does not receive any personal data, only the rating text and the associated star rating. However, it is possible that the reviewer publishes personal data in the review text, so that the service provider receives personal data in these cases. The legal basis for the analysis of the rating comment is Art. 6 para. 1 p. 1 lit. f GDPR. The user is obliged to carry out the balancing of interests and to inform the data subjects in accordance with Art. 13 GDPR. Trusted Shops is responsible for the technical implementation and associated obligations arising from the GDPR.

4.3 Sentiment Analysis

Data categories: submitted rating (text and stars)

Trusted Shops optionally provides the user with an AI-supported system to get aggregated qualitative review insights. The service provider does not receive any personal data, only the rating text and the associated star rating. However, it is possible that the reviewer publishes personal data in the review text, so that the service provider receives personal data in these cases. The legal basis for the analysis of the rating comment is Art. 6 (1) lit. f GDPR. The user is obliged to carry out the balancing of interests and to inform the data subjects in accordance with Art. 13 GDPR. Trusted Shops is responsible for the technical implementation and associated obligations arising from the GDPR.

Our services (TS-LV)

The offers are aimed exclusively at businesses.

Unless otherwise agreed, review, Trustmark and guarantee services are in principle performed for one (1) online presence (shop) owned by the member, under one domain, in one language version and aimed at a specific target market. For the performance of services for further online presences (e.g. further language version, further domain), further service packages must be acquired for each domain (booked certificates). All services will be performed in the language chosen for the respective target market.

Do you want to get even more out of your Trusted Shops membership? Then book our optional additional services. Each additional service can be booked individually for one online presence (shop), under one domain, in one language version and aimed at a specific target market. The availability of each optional additional package depends on the main target market of the online presence for which the additional service is to be booked. The available options for your online presence can be viewed in the Trusted Shops Online System and can be booked via the Upgrade Centre.

I. Service package per domain (booked certificate)

1. Trustbadge®

It is always in your visitors' field of vision and depending on your membership status displays your Trustmark, your grade and your rating stars. 2. Trusted Shops Customer reviews

a) Collect and show real service reviews

Verifiable positive ratings and customer reviews are an important indication of an online shop's trustworthiness for online shoppers.

The rating system provided in the agreed language includes the following functions:

- Online shop customers have the option of rating the shop based on at least one of the three predefined criteria which are customer service, delivery and product using a form provided by Trusted Shops (hereinafter referred to as "rating"). Rating stars on a scale of 1 to 5 can be awarded for each criterion, with 5 stars being the best.
- If you offer services via your online presence the 1-category-system is at your disposal. You customer can rate your online-presence according to the criterion "service". When offering goods you can benefit from our 3-category-system. The use of the 1-categorie-system will not be possible in this case. If you want to use the 1-category-system first and later on offer goods as well you will have to change to the 3-category-system. All collected ratings will be reset. The same applies accordingly to a change from the 3-category-system to the 1-category-system.
- Collection of customer reviews (comments) using an online form provided by Trusted Shops.

The ratings and customer reviews (jointly "ratings") are permanently stored and can be viewed by the online shop and Trusted Shops employees in a secure area of the online system (eTrusted platform). You have the option of downloading the reviews, analysing them and using them for advertising purposes. Please note the terms of use for reviews during and after the contract period.

b) SEO-optimized business profile (review profile)

Your customers reviews can be seen on your Trusted Shops review profile. Not only is this Search Engine Optimised (SEO) but its responsive design means it looks great on mobile and tablet too.

The review profile includes a summary of the ratings submitted in the last 12 months. An overall rating is calculated from all the ratings submitted during the last 12 months. Each of the criteria is included in the overall rating, weighted according to the number of ratings submitted. The rating profile specifies the star rating which the shop has achieved on the five-star rating scale based on the weighted average.

An average rating is calculated as follows:

Five-star scale	Overall rating
5 to 4.5	Excellent
< 4.5 to 3.5	Good
< 3.5 to 2.5	Fair
< 2.5 to 1.5	Poor
< 1.5 to 0	Very poor

c) Mobile app

Read, comment and manage your reviews while on the go by using our Mobile App (iOS/Android).

d) Number of ratings per month

There are no restrictions on the number of ratings! It is important for you to be able to receive as much feedback and as many opinions as possible.
